

MAD EYE

Three coffees and some mild anxiety but I've finally decided on this font size.

BIGGER

Reduce the font by 1 pt. Increase leading by 1 pt. It looks good but is still not totally legible. Increase letterspacing by 30. No, 60. Yah, that's a lot better. This is a condensed font and it looks all squished together without the extra spacing. Is this font too trendy? Will I get sued for using it in a school project? Now I'm kind of stressed out again. This is nice for web, but will it work in print? Lord help me.

I MOVED THIS SUBHEADER
12 TIMES ALREADY

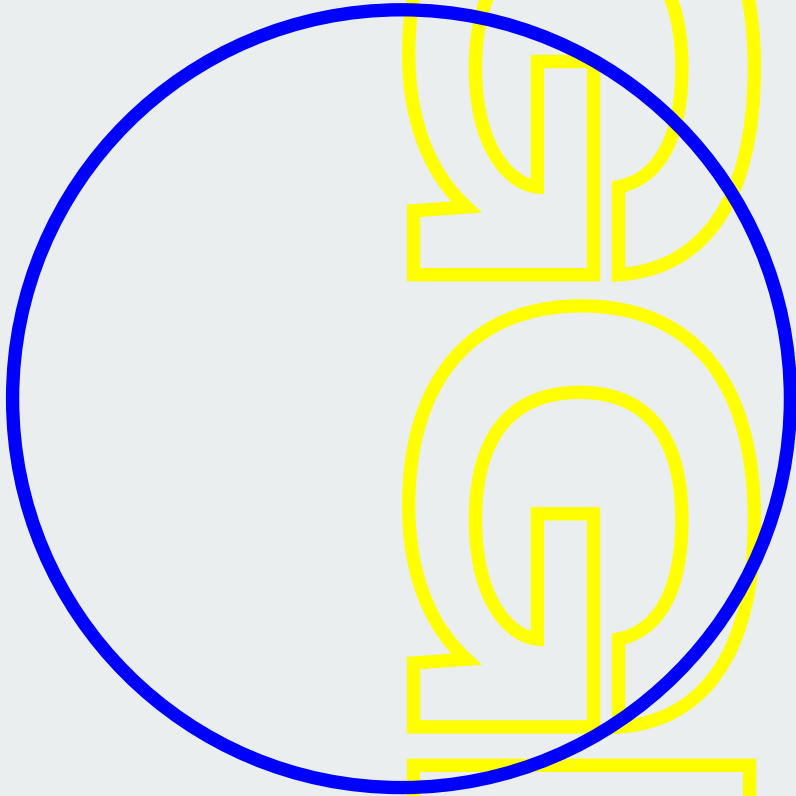

Why is all the weird cool stuff being made in Berlin right now? Pinterest is starting to piss me off.
